

Tips for less scrolling

- Use 2 monitors and enable ZoomText's dual monitor support
- Use the AppReader feature in ZoomText
- Use the DocReader feature in ZoomText
- Download the add-on for Internet Explorer called CleanPage which eliminates ads and fits the text on the screen: www.readonweb.com
- Purchase a larger screen
- Reduce the magnification level even if it means leaning in a bit closer to the screen
- Increase your screen resolution
- Switch to overlay mode which requires less movement
- Size separate windows and panes so that they are perfect for your desired magnification
- Print a document out instead

Tips to make scrolling easier

- Alt-arrow key instead of moving the mouse back and forth, alleviating hand and wrist ache
- Use the middle mouse button to scroll instead of moving the mouse back and forth
- Purchase a trackball mouse which is easier for scrolling
